

having a tooth adapted to engage a shoulder on said disk, said dog also having an arm, a knock out arm fixed to said housing in a position to engage with the said arm of the dog and a spring latch adapted to automatically engage said dog and hold it in an inoperative position when it has been moved to that position by the impact of

said knock out arm against the arm of the dog.

In testimony whereof, I hereunto affix my signature in the presence of two witnesses.

JOSEPH A. WILLIAMS.

Witnesses:

H. R. SULLIVAN,
E. L. THURSTON.
